Individual Achievement/Performance Description

Paul as assumed the devops lead for Avertack this year and he took that role and dove right in! Paul is responsible for the GitHub migration for Avertack, CIR and GFMS. He worked with his peers to get the migration completed and served as the subject matter expert. He also was responsible for providing leadership in the DORA integration for GFMS. Additionally, he has been reviewing all of the devops documentation and updating it to aid the rest of the team for next best action.
