Collect Data

- Positive/inclusive words
- Negative words and constructive alternatives
- Hand gestures
- Vocal Variety
- Pace
- Stage Presence

In Summation

Crucial points to summarize:

- Polished Speaker[®] support constructive speaking habits
- Characterize a speaker's presentation
- Collect data from a variety of speakers and rank effectiveness
- Together we can build a community of Polished Speakers!

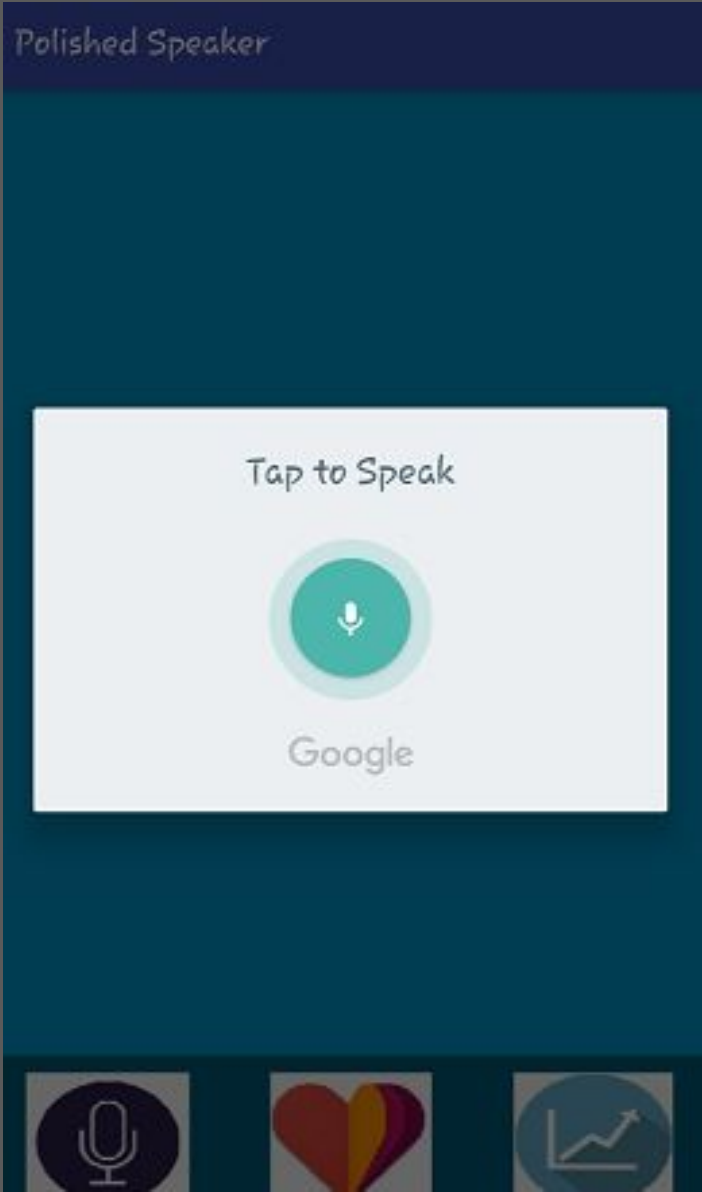

Backup

Even though you won't have time to present the slides beyond this point, include them as documentation. Your presentation in full may either be published or reviewed in full by your track leads, so any extra detail you want people to be aware of can be stored here but only presented if you still have time.

I **hate** presentations. I don't like being up here
and speaking to you. **Luckily**, I have an app
that will help **everyone** in this room be a **better**
speaker. I'm talking about **you**, **you** and even **you**.
Together, **we** will all **improve**!

Recommendations

-Duration: Too short. Try for a 5 minute speech.

-Pace: Too fast. Try to slow down.

-Steps: Try to use more of the stage area.

-Pauses: More pauses will help. See suggestions below.

-Avoid using the negative word 'hate'. Try constructive alternatives instead: 'tend to shy away from'.

-Try hand gestures with the following words: 'together', 'improve'.
