Avertack Cloud Migration And Dora Integration	AUG 2023

Cultural pillar this achievement best represents

This is about stepping up to speed up—owning your decisions and accelerating your actions to make us faster than the competition.

- Disciplined agility
- Empowerment
- Speed and decisiveness
- Discovery and improvement

Individual Achievement/Performance Description

Paul was doing double duty working on the cloud migration and integration of Avertack with the new DORA application. We had strict deadlines for both, and both were met on time. For the migration effort one of the risks in this project was to move the entire Avertack decision engine to cloud without impacting AT&T good customer transactions and to keep our fraud dollars lost at a minimum. Currently during this migration, there were no significant outages attributed to the Avertack team, the fraud rate is at its lowest point in years and we are on target to stop over \$3B fraud in transaction stops for 2023. DORA was a new directive from Jeremy Legg of which Avertack was chosen as one of the first applications to integrate.
